NEW BONDS OF UNION PACIFIC OFF A FRACTION.

New York, June 22.-The weakness of stocks today gave an impression of less passiveness than the occasional drop with intervals of recovery last week. There was only small expansion in the volume of the dealings to account for this appearance. The active desire shown to get out of holdings of one or two stocks was largely accountable for the changed tone of the dealings. Rock Lisland securities were the conspicuous example, in continuance of a sudden decline which commenced in the closing dealings on Saturday and which had a considerable influence in unsettling the tone. The rumors which circulated today in connection with the break in Rock Island seemed to be more in the nature of surmise to be more in the nature of surmise prompted by the movement of the stocks than any informed opinions. The movement gave rise to some fears of financial embarrassment facing the company or some one of its related companies in the complicated series of subsidiaries which distinguishes these enterprises. More than once during the last few months it has been reported that a comprehensive reorganization. prehensive reorganization plan was in contemplation. Today's rumors hinted at a coming bond issue, and even at a receivership, but these rumors were discredited in official quarters. Another supposition was of heavy losses from flood damage to the company's property, but this was denied by official of the company of the company's property.

damage to the company's property, but this was denied by officials of the company. The weakness of the Rock Island securities was of sympathetic effect on the whole stock market.

There was nothing in the general news to prompt selling of stocks. The accumulation of banking reserves is reaching a point that seems to necessitate active measures to find employment for these great sums. Paris took gold from London today and the unsatisfied appetite of that center and of Berlin for the precious metal constitutes the oniy ripple in the money market. Reports of the placing of part of the new bond issue of the National Railroad of Mexico with Paris bankers were believed to explain the decline in our foreign exchange market. Traffic officials of the great railroad system spoke in a tone of some encouragement of the business outlook, although having small actual increase in tonnage movement to report. Such as though having small actual increase in M. K. & T. tonnage movement to report. Such an increase was inferable from the statistics Natl. Lead of surplus idle freight cars on June 16, given out by the American Railroad association, the total at that time having fallen to 349,994, a decrease of 31,910 cars No. American since May 27. Some part of this show-ing is referred to the increase in cars

in bad condition, which are sent to the shops, but without figuring in the total of surplus or idle cars. The showing, nevertheless, is considered an important index of improving commercial conditions.

Weather in the winter wheat region was reported ideal for harvesting and this corrects a condition regarding which growing anxiety was beginning to be felt. The effect of this news was partly neutralized by the strength in the grain markets.

The closing tone was weak. A further break in the Rock Island collateral bonds and another fractional shading in the new Union Pacific 4s were features of the bond market, which was heavy.

Onto the September delivery and the narrowing the spread between that option and that of the July delivery. Several of the July delivery. Several of the Jeading houses were free sellers of July and active buyers of September. The selling pressure on the near-by month was caused by the excellent weather for harvesting in the southwest. The principal bullish influences were advanced at the leading European markets. Liverpool excepted, a decrease of seven million bushels in the amount of breadstuffs on passage, a liberal falling off in the world's shipments, and reports of small yields in Kansas. The market closed steady for July and strong for September and December. July opened 12014 to 1406 to 1406
